

This simple script produces a 3D screenshot that can be posted on Facebook as a 3D Photo (ie iphone feature)

Steps to use :

- add the Naps_3d_screenshot component as is on your camera.
- press F11 once (or inspector button) to Save 3D Screenshot.
- screen3D.jpg and screen3D_depth.jpg will be saved on project root.
- post screen3D.jpg together with screen3D_depth.jpg on Facebook.
- tip : adjust far clip plane for tight depth and better results
- tip : adjust contrast/brightness for better results or do it later on any photo editor
- tip : credit/tag Naps Team and or Baldo when posting to social for sincere appreciation
